

ABSTRACT OF THE DISCLOSURE

Methods and compositions are disclosed utilizing the optically pure (-)-isomer of bupropion to assist in smoking
5 cessation, for treating smoking and nicotine addiction, and
for treating pain, including, but not limited to, chronic
pain, neuropathetic pain and reflex sympathetic dystrophy,
and other disorders such as narcolepsy, chronic fatigue
syndrome, fibromyalgia, seasonal affective disorder and
10 premenstrual syndrome, while avoiding adverse affects
associated with racemic bupropion.
